Additional Information on Eligibility:

Agency Name

Fish and Wildlife Service

Description

The U.S. Fish and Wildlife Service (Service) Fisheries Program's National Fish Passage Program is a voluntary, non-regulatory conservation assistance program that provides financial and technical assistance to remove or bypass artificial barriers that impede the movement of fish and other aquatic species and contribute to their decline. The National Fish Passage Program received $11.0 million of operational funds to implement the program in Fiscal Years 2011. The Service will implement fish passage improvement-based, cost-shared projects to

protect, restore, or enhance habitats that support fish and other aquatic species and their populations. All or a portion of project funds may be transferred to partner organizations through cooperative agreements if the Service lacks the capability to implement a project. To determine eligibility of a specific project contact the REGIONAL COORDINATOR in your area. A list of Coordinators and their responsible geographical areas is attached to this announcement under the APPLICATION INSTRUCTIONS.

Agency Name:	Bureau of Justice Assistance
Description:	BJA's Harold Rogers Prescription Drug Monitoring Program (PDMP) National Training and Technical Assistance (TTA) Program supports the Harold Rogers PDMP Discretionary Grants Program. The primary purpose of Harold Rogers PDMP grants is to enhance the capacity of regulatory and law enforcement agencies and public health officials to collect and analyze controlled substance prescription data and other scheduled chemical products through a centralized database administered by an authorized state agency. The program was created by the FY 2002 U.S. Department of Justice Appropriations Act (Public Law 107-77) and has

received funding under each subsequent year's Appropriations Act. BJA is seeking a provider to deliver TTA on a national level to PDMP grantees and other state agencies to assist them with developing effective strategies for planning, implementing, or enhancing prescription drug monitoring programs.

Description:	Healthy, vibrant communities are places that provide the opportunities, resources, and an environment that children, youth, and adults need to maximize their life outcomes, including high-quality schools and cradle-to-career educational programs; high-quality and affordable housing; thriving commercial establishments; access to quality health care and health services; art and cultural amenities; parks and other recreational spaces; and the safety to take advantage of these opportunities. Unfortunately, millions of Americans live in distressed neighborhoods where a combination of crime, poverty, unemployment, poor health, struggling schools, inadequate housing, and disinvestment keep

many residents from reaching their full potential. The complexity of these issues has led to the emergence of comprehensive place-based and community-oriented initiatives that involve service providers from multiple sectors, as well as community representatives from all types of organizations, to work together to reduce and prevent crime and to revitalize communities. In many ways, community safety and crime prevention are prerequisites to the transformation of distressed communities, including the revitalization of civic engagement. Addressing community safety is the role of criminal justice agencies, the community and its partners as a whole. To improve and revitalize communities, all relevant stakeholders should be included: law enforcement and criminal justice, education, housing, health and human services, community and faith-based non-profits, local volunteers, residents, and businesses. Given the significant needs and limited resources of some of these communities, local and tribal leaders need tools and information about crime trends in their jurisdiction and assistance in assessing, planning, and implementing the most effective use of criminal justice resources to address these issues. Research suggests that crime clustered in small areas, or "crime hot spots," accounts for a disproportionate amount of crime and disorder in many communities. As a result, the criminal justice field has been creating new evidence-based strategies designed to prevent and deter future crime in hot spots. Many communities need assistance to

	implement data-driven problem solving strategies that target crime and safety concerns. The Byrne Criminal Justice Innovation (BCJI) Program is part of the Neighborhood Revitalization Initiative (NRI), which provides neighborhoods with coordinated federal support in the implementation of place-based strategies as part of larger comprehensive neighborhood revitalization efforts. NRI includes programs within agencies such as the Departments of Education, Justice, Health and Human Services, Housing and Urban Development, and Treasury.

Agency Name:	Bureau of Justice Assistance
Description:	Project Safe Neighborhoods (PSN) is designed to create safer neighborhoods through a sustained reduction in crime associated with gang and gun violence. The program's effectiveness is based on the cooperation of local, state, and federal agencies engaged in a unified approach led by the U.S. Attorney (USA) in each district. The USA is responsible for establishing a collaborative PSN task force of federal, state, and local law enforcement and other community members to implement gang and gun crime enforcement, intervention, and

prevention initiatives within the district. Through the PSN task force, the USA will implement the five design features of PSN—partnerships; strategic planning, research integration, and crime analysis; training; outreach; and accountability—to address specific gun crime and gang violence, in the most violent neighborhoods. Details on the five design features (also referred to as core elements) can be found on page 5-6 and online at www.ncjrs.gov/html/bja/205263/. The Department of Justice has transitioned the PSN program from a formula-based allocation of funding to a competitive-based program. In a competitive environment, "need" and use of more effective, intelligence- and data-driven strategies will be key factors for funding selections, in addition to performance results and other factors. Therefore, grant awards for FY 2014 and beyond will be made through a competitive process to encourage and focus funding in high-performing and evidence-based programs where the need is greatest and where the most violent neighborhoods, within districts, are being addressed.

Agency Name: Bureau of Justice Assistance

Description: The Smart Prosecution Initiative (Pub. L. No. 113-76, 128 Stat. 5, 61) is administered by BJA as part of its "Smart Suite" of crime-fighting programs—Smart Policing, Smart Supervision, Smart Pretrial, and now, Smart Prosecution. BJA established the first program within this Smart Suite over 4 years ago with the launch of Smart Policing. Smart Policing supports law enforcement agencies in building evidence-based, data-driven law enforcement tactics and strategies that are effective, efficient, and economical. Smart Policing represents a strategic approach that brings more "science" into police operations by leveraging innovative applications of analysis, technology, and evidence-based practices. The goal of the Smart Policing Initiative is to improve policing performance and effectiveness while containing costs; an important consideration in today's fiscal environment. For more information on Smart Policing, see the program's fact sheet: www.smartpolicinginitiative.com/sites/all/files/SPI_One_Pager_2013.pdf . Prosecutors are key decisionmakers and policymakers in the criminal justice system. They represent the community, strive to control crime, and ensure that justice prevails. The local prosecutor ensures that justice is done in a fair, effective and efficient manner, and is focused on three goals: 1) to promote the fair, impartial, and expeditious pursuit of justice; 2) to ensure safer communities; and 3) to promote integrity in the prosecution

profession and effective coordination in the criminal justice system.1 BJA's Smart Prosecution Initiative is designed to promote effective data-driven research-based approaches to prosecution and prosecutor-led justice systems innovations and reforms. The Smart Prosecution model will build off of the lessons learned from BJA's Smart Suite of crime-fighting programs described above. Smart Prosecution seeks to pair an operational, results-focused researcher with a prosecutor's office to develop data-driven solutions which create effective, efficient, and just prosecution strategies which will ultimately improve public safety. It will provide other valuable resources to equip a prosecutor's office to access data across various criminal justice and non-criminal justice information systems to improve results for communities. Fighting crime and creating safer communities is enhanced by data-driven, research-based criminal justice models. BJA hopes that the lessons learned will develop a rich body of evidence for use by prosecutors nationally as they seek to work with communities to solve chronic problems and fight violent crime. These concepts will be supported throughout the Smart Prosecution Initiative with the initial group of grantees who will be awarded under a separate FY 2014 competitive grant announcement. This competitive grant announcement specifically requests applications for one national training and technical assistance (TTA) provider to support and build capacity in the field and among those jurisdictions selected to be Smart Prosecution sites. This grant

	announcement does not solicit applications from individual jurisdictions to fund local smart prosecution programs.

Description:	BJA's mission is to provide leadership and services through grant administration and criminal justice policy development to support local, state, and tribal justice strategies to achieve safer communities. Driving BJA's work in the field is the following principles: to reduce crime, recidivism, and unnecessary confinement, and promote a safe and fair criminal justice system. To implement our strategies consistent with these principles, BJA supports effective criminal justice policy, programs, information sharing, and collaborations within state, local, and tribal agencies and communities, and promotes the use of data, research, and information to increase the effectiveness of criminal justice programs. BJA has four primary components: Policy, Programs, Planning, and the Public Safety Officers' Benefits Office. The Fellows will work in the Policy Office, which provides national leadership in criminal justice policy, training, and technical assistance to further the administration of justice. It also acts as a liaison to national organizations that partner with BJA to set policy and help disseminate information on best and promising practices. To address emerging issues and build capacity to improve the administration of criminal justice, BJA launched the BJA Visiting

Fellows Program in FY2012. The intent is to leverage state, local, or tribal subject-matter expertise to assess areas of need and to develop strategies, tools, and policies in collaboration with BJA staff for the benefit of the criminal justice field. By hosting up to five Fellows with FY 2014 funds, BJA will collaborate with practitioners and researchers to build capacity to address gaps in priority and emerging issues in the criminal justice field. BJA encourages potential applicants from a broad range of disciplines to consider how their work in areas related to crime and justice might support work in the BJA Visiting Fellows Program's priority issue areas outlined below.

Description: The Face Forward 2 - Intermediary and Community grants will offer organizations the opportunity to develop programs that address the employment barriers of court involved youth while helping these youth develop the employment skills needed to obtain good jobs. These grants will help participants move forward into the future by combining the most promising workforce and juvenile justice strategies available. These grants will systematically improve the workforce outcomes of court-involved youth who will obtain industry-recognized credentials that prepare them for jobs in demand industries using career pathways. The core project components for these grants include: case management, mentoring, educational interventions, service-learning, occupational training in demand industries which lead to industry-recognized credentials, workforce activities that lead to employment, follow-up activities, and expungement and diversion. The expungement and

diversion components will be provided through the juvenile justice system (JJS) and non-profit legal services organizations. Grantees or sub-grantees of intermediary organizations must collaborate with the local components of the JJS to ensure court-involved youth receive referrals into programs as a means of diverting the youth's juvenile charge(s), and collaborate with non-profit legal services organizations to provide legal services that assist program participants with expungement. The Employment and Training Administration (ETA) plans to award four intermediary organization grants of $5 million each and approximately 16 community organization grants of up to $1.5 million each, totaling approximately $44 million, to provide services to court-involved youth between the ages of 14 to 24 that have been involved in the JJS and never convicted in the adult criminal system. Applicants may only submit one application in response to this solicitation. Applicants must choose between submitting an intermediary or community grant application.

Agency Name: Employment and Training Administration

Description: The Employment and Training Administration (ETA), U.S. Department of Labor (We, DOL, or the Department), announces the availability of approximately $150 million in funds for the H-1B Ready to Work Partnership (Ready to Work) grant program. The Department expects to fund approximately 20-30 grants with individual grant amounts ranging from $3 million to $10 million. This grant program is designed to provide long-term unemployed workers with individualized counseling, training and supportive and specialized services leading to rapid employment in occupations and industries for which employers use H-1B visas to hire foreign workers. A small percentage of other unemployed and/or incumbent workers may also be served through this program. These grants are financed by a user fee paid by employers to bring foreign workers into the United States under the H-1B nonimmigrant visa program. This program was authorized under Section 414 (c) of the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA), as amended (29 USC 2916a). Grant awards will be made only to the extent that funds are available. Grants will be awarded to the lead applicant of a public and private partnership of entities that

includes: the workforce investment system; training providers, such as community colleges and community-based and faith-based organizations; and, business and business-related groups, trade associations, nonprofit business or industry, organizations functioning as workforce intermediaries for the expressed purpose of serving the needs of businesses, individual businesses, or consortia of businesses. As a pre-condition to be considered for Ready to Work funding, there must be at least three employers or a regional industry association consisting of at least three employers who are actively engaged in the project. Additional partners that reflect the character and resources of the local or regional economy and the community are strongly encouraged. Finally, the department is committed to producing strong evidence on the effectiveness of the grantee programs and full participation in any national evaluation initiated by DOL is a condition of all grants awarded.

Estimated Total Program Funding:	$73,000,000
Award Ceiling:	$1,100,000
Eligible Applicants:	Others (see text field entitled "Additional Information on Eligibility" for clarification)
Additional Information on Eligibility:	Eligible applicants for these grants are public or private non-profit agencies or organizations including rural, urban, or Native American agencies that have previously served disadvantaged youth in a YouthBuild or other similar program. These agencies include, but are not limited to: - Faith-based and community organizations; - An entity carrying out activities under the Workforce Investment Act (WIA), such as a local workforce investment board or American Job Center (formerly known as One-Stop Career Center); - An educational institution, including a local school board, public school

district, or community college; - A community action agency; - A state or local housing development agency; - An Indian tribe or other agency primarily serving American Indians; - A community development corporation; - A state or local youth service conservation corps; or - Any other public or private non-profit entity that is eligible to provide education or employment training under a Federal program. Grantees who received funding from the Fiscal Year (FY) 2013 YouthBuild competition [SGA/DFA PY 12-02] are funded through November 2016 and these grantees (based on their unique Employer Identification Numbers) are not eligible to participate in this competition.

Agency Name: Employment and Training Administration

Description: The Employment and Training Administration (ETA), U.S. Department of Labor (DOL or Department), announces the availability of approximately $73 million in grant funds authorized by the YouthBuild provisions of the Workforce Investment Act (29 USC 2918a). YouthBuild grants will be awarded through a competitive process. Under this Solicitation for Grant Applications (SGA), DOL will award grants to organizations to oversee the provision of education, occupational skills training, and employment services to disadvantaged youth in their communities while performing meaningful work and service to their communities. Based on our estimate of FY 2014 funding,

	DOL hopes to serve approximately 4,950 participants during the grant period of performance, with approximately 75 projects awarded across the country.

Estimated Total Program Funding:	$30,000,000
Award Ceiling:	$2,000,000

Eligible Applicants:	Others (see text field entitled "Additional Information on Eligibility" for clarification)
Additional Information on Eligibility:	Any non-profit organization may apply for these grants, including faith and community-based organizations. The applicant must propose to provide services to only eligible participants (as defined in Section III.C.3and be located, in an urbanized area or urban cluster as those terms are defined by the U.S. Census Bureau. The community served must also have both high-poverty and high-crime rates, as High-poverty rate: communities with poverty rates of at least 30 percent (applicants must use American Community Survey data to show the average poverty rate of the various Census Tracts included in their target community). For more information, see Section IV.B.3. - High-crime rate: communities with felony crime rates within the targeted area that are higher than the felony crime rate in one or more adjoining communities (applicants must provide the strategy for determining the high-crime rate). For more information, see Section IV.B.3.
Agency Name:	Employment and Training Administration
Description:	This Training to Work 2-Adult Reentry (T2W2) Solicitation for Grant Application (SGA) provides the opportunity for organizations to develop and implement career pathway programs in demand sectors and occupations for men and women who are at least 18 years old and who are enrolled in work release programs (WRPs). Additionally, grantees must provide a strategy to prioritize services to veterans that are in these WRPs. Career pathways are

frameworks that help to define and map out a sequence of education, training and workforce skills training resulting in skilled workers that meet employers' needs. Career pathways are an approach to linking and coordinating education and training services in ways that enable workers to attain such credentials, and ultimately, employment. ETA plans to award approximately 15 grants of up to $2,000,000 each, totaling up to approximately $30 million to serve male and female ex-offenders, referred to in this SGA as returning citizens, in WRPs as authorized by the Workforce Investment Act (WIA) and the Second Chance Act of 2007. The term "returning citizens" refers to formerly incarcerated individuals (i.e. ex-offenders). Priority must be given to those returning citizens that are veterans. Awards made under this announcement are subject to the availability of Federal funds. In the event that additional grant funds become available, ETA reserves the right to award additional grants from the applications submitted in this solicitation. Applicants may only submit one application in response to this SGA. Grantees may not expend more than $8,000 per participant. These grants have a performance period of operation of 39-months, which includes a planning period, implementation, and a follow-up period. Additionally, grants will be awarded to areas with high-poverty and high-crime rates, including promise zones that have a large proportion of returning citizens in these communities and typically experience higher rates of recidivism.

Grants for Organizations

We fund **projects** only. Projects may consist of one or more specific events or activities. Projects do not have to be new. Excellent existing projects can be just as competitive as new activities. Projects do not need to be big either; we welcome small projects that can make a difference in their community or field.

Art Works

To support the creation of art that meets the highest standards of excellence, public engagement with diverse and excellent art, lifelong learning in the arts, and the strengthening of communities through the arts. Matching grants generally range from $10,000 to $100,000.

Additional Information on Eligibility: • Meet the Arts Endowment's "Legal Requirements" including nonprofit, tax-exempt status at the time of application. (All organizations must apply directly on their own behalf. Applications through a fiscal sponsor are not allowed. See more information on fiscal sponsors.) • Have a three-year history of programming prior to the application deadline. • Have submitted acceptable Final Report packages by the due date(s) for all Arts Endowment grant(s) previously received. Starting with grants that were awarded in FY 2011 (as indicated by a grant letter dated on or after October 1, 2010, and a grant number beginning with "11 - 78"), an organization that receives Challenge America Fast-Track grants for three years in a row is not eligible to apply to the Fast-Track category for the following one-year period. Therefore, an organization that has received grants in FY 2012, 2013, and 2014 may not apply under these FY 2015 guidelines. That organization may apply for FY 2015 support under other Arts Endowment funding opportunities including Art Works. The organization would be able to apply to the Challenge America Fast-Track category again in FY 2016.

Agency Name: National Endowment for the Arts

Description: The Challenge America Fast-Track category offers support primarily to small and mid-sized organizations for projects that extend the reach of the arts to underserved populations -- those whose opportunities to experience the arts are limited by geography, ethnicity, economics, or disability. Age alone (e.g., youth, seniors) does not qualify a group as underserved; at least one of the underserved characteristics noted above also must be present. Grants are available for professional arts programming and for projects that emphasize the potential of the arts in community development. This category encourages and supports the following two outcomes: • Engagement: Engaging the public with diverse and excellent art. • Livability: The strengthening of communities through the arts. You will be asked to select the outcome that is most relevant to your project. When making selections, you should identify the outcome(s) that reflect the results

expected to be achieved by your project. If you receive a grant, you also will be asked to provide evidence of those results. Challenge America Fast-Track grants: • Extend the reach of the arts to underserved populations. • Are limited to the specific types of projects outlined below. • Are for a fixed amount of $10,000 and require a minimum $10,000 match. • Receive an expedited application review. Organizations are notified whether they have been recommended for a grant approximately six months after they apply; projects may start shortly thereafter. essential. Each applicant must present a simple, straightforward project that reflects only one of the project types below. Fast-Track grants are available only for: Engagement: Engaging the public with diverse and excellent art. • An arts event or events that will feature one or more guest artists. The project (such as a festival, exhibit, recital, reading, performance, screening, broadcast, lecture) must include the participation of guest artist(s). Artistic staff and resident artists of an applicant organization do not qualify as guest artists. In addition to artists' fees, the project may include public relations, professional documentation, and program enhancements that are integral to the event. Examples of program enhancements include interpretive material, transportation, program accommodations (e.g., sign language interpretation, audio description, Braille, tactile exhibit tours), catalogues, brochures, or publications. Other enhancements such as specific lecture-demonstrations, pre- or post-event talks, or workshops relevant to the proposed arts event also are eligible. NOTE: Projects that involve curriculum-based arts instruction are not eligible (see Arts Education in the Arts Works category). • The unified promotion of community-wide arts activities and resources to enhance cultural tourism or activities in cultural districts (including promoting the arts to underserved populations). NOTE: Promotional projects for a single organization are not eligible. Unified promotion is defined as the professional assessment, design, and/or distribution of public relations tools (calendars, websites, brochures, rack cards, signage, etc.) designed to benefit several local organizations. • The development of professionally directed public art projects. This project type is for visual arts projects only (such as murals, sculptures, or environmental art) that are developed through community engagement. Evidence of community involvement in the planning, design, or fabrication of the work must be apparent. Please note that

these activities may require applicants to provide information in accordance with the National Environmental Policy Act and/or the National Historic Preservation Act. See here for more information.

Description: The Preservation and Access Education and Training program is central to NEH¿s efforts to preserve and establish access to cultural heritage collections. Thousands of libraries, archives, museums, and historical organizations across the country maintain important collections of books and manuscripts, photographs, sound recordings and moving images, archaeological and ethnographic artifacts, art and material culture collections, electronic records, and digital objects. The challenge of preserving and making accessible such large and diverse holdings is enormous, and the need for knowledgeable staff is significant and ongoing. Preservation and Access Education and Training grants are awarded to organizations that offer national or regional (multistate) education and training programs. Grants aim to help the staff of cultural institutions, large and small, obtain the knowledge and skills needed to serve as effective stewards of humanities collections. Grants also support educational programs that prepare the next

	generation of conservators and preservation professionals, as well as projects that introduce the staff of cultural institutions to new information and advances in preservation and access practices.

Agency Name:	National Endowment for the Humanities
Description:	Preservation and Access Research and Development grants support projects that address major challenges in preserving or providing access to humanities collections and resources. These challenges include the need to find better ways to preserve materials of critical importance to the nation's cultural heritage from fragile artifacts and manuscripts to analog recordings and digital assets subject to technological obsolescence and to develop advanced modes of searching, discovering, and using such materials. Applicants should define a specific problem, devise procedures and potential solutions, and explain how they would evaluate their projects and disseminate their findings. Project results must serve the needs of a significant number of humanists.

Eligible Applicants:	Individuals
Agency Name:	National Endowment for the Humanities

Description:

The Fellowship Program for Advanced Social Science Research on Japan is a joint activity of the Japan-U.S. Friendship Commission (JUSFC) and the National Endowment for the Humanities. Awards support research on modern Japanese society and political economy, Japan's international relations, and U.S.-Japan relations. The program encourages innovative research that puts these subjects in wider regional and global contexts and is comparative and contemporary in nature. Research should contribute to scholarly knowledge or to the general public's understanding of issues of concern to Japan and the United States. Appropriate disciplines for the research include anthropology, economics, geography, history, international relations, linguistics, political science, psychology, public administration, and sociology. Awards usually result in articles, monographs, books, digital materials, archaeological site reports, translations, editions, or other scholarly resources. The fellowships are designed for researchers with advanced language skills whose research will require use of data, sources, and documents in their original languages or whose research requires interviews onsite in direct one-on-one contact. Fellows may undertake their projects in Japan, the United States, or both, and may include work in other countries for comparative purposes. Projects may be at any stage of development.

National Science Foundation

General Funding Overview

The National Science Foundation funds research and education in most fields of science and engineering. It does this through grants, and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the United States. The Foundation accounts for about one-fourth of federal support to academic institutions for basic research.
NSF receives approximately 40,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships.
The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Additional Information on Eligibility:	*Organization Limit: Proposals may only be submitted by the following: - The student must be enrolled at a U.S. academic institution, but need not be a U.S. citizen. Proposals from women, minorities, and persons with disabilities are strongly encouraged. *PI Limit: The proposal must be submitted by the dissertation advisor(s) on behalf of the graduate student who is at the point of initiating or already conducting dissertation research.
Agency Name:	National Science Foundation
Description:	The National Science Foundation's Division of Behavioral and Cognitive Sciences (BCS), Division of Social and Economic Sciences (SES), National Center for Science and Engineering Statistics (NCSES), and the SBE Office of Multidisciplinary Activities (SMA) award grants to doctoral students to improve the quality of dissertation research. These grants provide funds for items not normally available through the student's university. Additionally, these grants allow doctoral students to undertake significant data-gathering projects and to conduct field research in settings away from their campus that would not otherwise be possible. Proposals are judged on the basis of their scientific merit, including the theoretical importance of the research question and the appropriateness of the proposed data and methodology to be used in addressing the question. In an effort to improve the quality of dissertation research, many programs in both BCS and SES, the Research

on Science and Technology Surveys and Statistics program within NCSES, and the Science of Science and Innovation Policy program in SMA accept doctoral dissertation improvement grant proposals. Requirements vary across programs, so proposers are advised to consult the relevant program's webpage for specific information and contact the program director if necessary. Starting or growing a business? Owning a small business can be a fulfilling endeavor, but as you probably already know or are just finding out – it requires that you wear many hats. This of course leaves you with little time to take a deep dive into the many aspects of starting and growing a business. Instead, many business owners turn to search engines for answers when questions come up.

But what if you had access to a small business classroom that provided informed, accurate and always-available access to the advice and guidance you need?

Welcome to the **SBA Small Business Learning Center**.

Online Training and Tools for Small Business Owners

Launched in late 2012, the SBA Small Business Learning Center is an online portal that hosts a variety of self-paced online training courses, quick videos, web chats and more to help small business owners explore and learn about the many aspects of business ownership.

Content is filtered by topic, so no matter the stage of your business, or the kind of insight you need, you can quickly get answers.

For example, if you're wondering how SBA loan programs work or just need a primer in accounting or small business taxes, check out these self-paced online financing courses and short videos. Or explore tips from the pros in these archived SBA Web Chats.

Other topics covered include starting a business as a young entrepreneur, an introduction to franchising, taking your business global with exporting, marketing 101, selling to the U.S. government, and much more.

Get More Help Offline

And if you can't find the training or advice that you need, use the "Get Local Assistance" interactive map to find one of many small business counseling, assistance and mentoring organizations in your community.

Browse around, and let us know what you think about the SBA Small Business Learning Center!

What the New Healthcare Law Means for Your Small Business

Meeting Description:

This webinar will focus on what the new healthcare law, the Affordable Care Act, means for small businesses. It will focus on both federal and state provisions to help local small business owners understand how the law will affect them. Topics being discussed include:

- Small business tax credits (available to businesses and tax-exempt non-profits)— who's eligible for them and how to claim them
- Marketplace updates
- Shared responsibility
- Cost containment
- Tools and resources available for small businesses interested in learning more about the law

A question and answer period will follow.

Funding Opportunity Title:	The FAA Center of Excellence (COE) for Unmanned Aircraft Systems
Opportunity Category:	Other
Funding Instrument Type:	Cooperative Agreement
Category of Funding Activity:	Science and Technology and other Research and Development
Category Explanation:	
Expected Number of Awards:	
CFDA Number(s):	20.109 -- Air Transportation Centers of Excellence
Cost Sharing or Matching Requirement:	Yes
Posted Date:	Mar 28, 2014
Creation Date:	Mar 28, 2014
Original Closing Date for Applications:	Sep 15, 2014
Current Closing Date for Applications:	Sep 15, 2014
Archive Date:	Oct 15, 2014
Eligible Applicants:	Others (see text field entitled "Additional Information on Eligibility" for clarification)
Additional Information on Eligibility:	Institutions of higher education and their affiliates
Agency Name:	DOT - FAA Centers of Excellence
Description:	SUMMARY: In accordance with Public Law 101-508, the FAA plans to competitively select a Center of Excellence for UAS within the next year. The COE will be a geographically disbursed consortium of the FAA, university partners and their affiliates selected by the FAA Administrator to conduct UAS related research, education and training while working jointly on issues of mutual interest and concern. The FAA will initially issue cooperative agreements to the selected university team members and specific projects will be defined

and funded through matching grants over the life of the COE. In accordance with Public Law 101-508, the COE is responsible for matching all funds granted to establish, operate and conduct related research, and may contract with others as appropriate. Following the COE competitive process, the FAA sponsor may also generate requirements that would be supported through contract tasks awarded by the FAA to the COE member universities for FAA purpose. SELECTION CRITERIA: The FAA Administrator will select the COE team on the ability of the applicant to meet the following criteria mandated by Congress: --The extent to which the needs of the State in which the applicant is located are representative of the needs of the region for improved air transportation services and facilities. --The demonstrated research and extension resources available to the applicant for carrying out the intent of the legislation. --The capability of the applicant to provide leadership in making national and regional contributions to the solution of both long-range and immediate air transportation problems. --The extent to which the applicant has an established air transportation program. --The demonstrated ability of the applicant to disseminate results of air transportation research and educational programs through a statewide or region-wide continuing education program. --The research projects that the applicant proposes to carry out under the grant. Please Note: • All criteria are weighted equally. • A page limit will be specified in the Draft and Final

Solicitations. • The actual projects supported through the COE will be defined and further evaluated following selection of the COE members. A research agenda will be developed during the first year of operation, and additional topic related tasks will be funded throughout the life of the Center. -2- RESEARCH AREAS: The FAA intends for the Center members to support a broad range of research areas. Topics will include, but will not be limited to, the following: 1. Air Traffic Control Interoperability 2. Airport Ground Operations 3. Command and Control (C2) 4. Detect and Avoid (DAA) 5. Human Factors 6. System Performance 7. Privacy Practices for UAS Operations 8. System Engineering 9. Unmanned Aircraft Pilot Training and Pilot Certification Including Other UA Crew Members. The FAA anticipates the COE will attract organizations such as industrial groups and other public and private entities interested in collaborating with and coordinating the research and related activities that will generate solutions to immediate and long-term UAS related issues. These organizations may be considered as affiliate members by the COE core universities and may provide matching contributions and receive funding from the COE. The FAA will issue a Draft Solicitation, allow for a period of public comment, and discuss the COE and UAS technical requirements at a public meeting that will be conducted in the Washington, DC area in May. For additional UAS information and public meeting registration details, visit the COE UAS website: https://faa-uas-coe.net.

	-3- This meeting is a condition of the procurement process and potential applicants are encouraged but are not required to attend. Registration prior to the meeting, however, will be mandatory. Contact: Patricia.Watts@FAA.gov to be placed on the COE mailing list for future COE notifications. AWARD DATE: The FAA Administrator expects to announce the final selection of the COE for UAS core team within the next year. Issued in Atlantic County, New Jersey on March 28, 2014. Funding levels to be determined

REMINDER!

The Small Business Innovative Research Program - SBIR Program

The Small Business Innovation Research (SBIR) program is a highly competitive program that encourages domestic small businesses to engage in Federal Research/Research and Development (R/R&D) that has the potential for commercialization. Through a competitive awards-based program, SBIR enables small businesses to explore their technological potential and provides the incentive to profit from its commercialization. By including qualified small businesses in the nation's R&D arena, high-tech innovation is stimulated and the United States gains entrepreneurial spirit as it meets its specific research and development needs.

SBIR Mission and Program Goals

The mission of the SBIR program is to support scientific excellence and technological innovation through the investment of Federal research funds in critical American priorities to build a strong national economy.

The program’s goals are four-fold:

- Stimulate technological innovation
- Meet Federal research and development needs.
- Foster and encourage participation in innovation and entrepreneurship by socially and economically disadvantaged persons.
- Increase private-sector commercialization of innovations derived from Federal research and development funding.

SBIR-Participating Agencies

Each year, Federal agencies with extramural research and development (R&D) budgets that exceed $100 million are required to allocate 2.5 percent of their R&D budget to these programs. Currently, eleven Federal agencies participate in the program:

- Department of Agriculture
- Department of Commerce - National Institute of Standards and Technology
- Department of Commerce - National Oceanic and Atmospheric Administration
- Department of Defense
- Department of Education
- Department of Energy
- Department of Health and Human Services
- Department of Homeland Security
- Department of Transportation
- Environmental Protection Agency
- National Aeronautics and Space Administration
- National Science Foundation

Each agency administers its own individual program within guidelines established by Congress. These agencies designate R&D topics in their solicitations and accept proposals from small businesses. Awards are made on a competitive basis after proposal evaluation.

Three-Phase Program

The SBIR Program is structured in three phases:

Phase I. The objective of Phase I is to establish the technical merit, feasibility, and commercial potential of the proposed R/R&D efforts and to determine the quality of performance of the small business awardee organization prior to providing further Federal support in Phase II. SBIR Phase I awards normally do not exceed $150,000 total costs for 6 months.

Phase II. The objective of Phase II is to continue the R/R&D efforts initiated in Phase I. Funding is based on the results achieved in Phase I and the scientific and technical merit and commercial potential of the project proposed in Phase II. Only Phase I awardees are eligible for a Phase II award. SBIR Phase II awards normally do not exceed $1,000,000 total costs for 2 years.

Phase III. The objective of Phase III, where appropriate, is for the small business to pursue commercialization objectives resulting from the Phase I/II R/R&D activities. The SBIR program does not fund Phase III. Some Federal agencies, Phase III may involve follow-on non-SBIR funded R&D or production contracts for products, processes or services intended for use by the U.S. Government
